

Introducing Zcash to tertiary institutions

Primary Contact:	Marolt Digital Consults
Amount requested:	\$3,000 USD (up front)
Why is an upfront payment required?	<p>We propose to conduct a tech conference with the goal of raising awareness of zcash among tertiary students.</p> <p>We all know how many excellent ideas Genz and adolescents have. Bringing zcash to them provides an avenue for fine-tuning their ideas and allowing them to find expression.</p> <p>This is why a down payment is asked we will be booking a venue as our major goal is to reach a big number of youths, we will also require a robust sound system, projectors, posters, and fliers. We will not need to pay labor, but we will provide small refreshments to volunteers.</p> <p>To begin, we will target two large institutions. Delta State University Abraka and the Federal University of Petroleum Resources Warri. both located in Delta State, Nigeria.</p> <p>We recognize that asking for an upfront payment may result in our request not being considered; nevertheless, we aim to make this a large undertaking and do not have the financial resources to pull it off.</p> <p>You can choose to pay us 50% of the entire fee up front and the balance amount at the end of the job.</p>

	<p>This will allow us to employ our own resources in the program planning.</p>
<p>Grant Description:</p>	<p>Our main goal is to raise awareness about zcap among Genz, youth, and adults. However, our objective is to target tertiary institutions by presenting tech conferences there.</p> <p>Banners, leaflets, and social media content / posts will be part of our publicity plan. we will also be engaging the student union government (SUG), dean of students affairs of each institution, as well as Christian and Islamic campus fellowships. Because religious and classroom meetings attract a big number of students in schools.</p> <p>We'll show them examples and testimony of how Zcash can make their dreams come true. This is the purpose of our grants. We won't have to deal with goons or community touts because we'll be inside the school grounds. However, the school academic calendar will be our greatest impediment.</p> <p>So we'll have to pick a day that doesn't conflict with any examinations or school events.</p>
<p>Team:</p>	<p>Fullname : Ebrusike Favour Email : ebrusikefavour@gmail.com Position for the project: Head of operations</p> <p>Determined Software Engineer with a decade in the field of software development and more than 5 years of expertise in developing web-planning projects in fast-paced environments requiring fast turnaround.
